Opportunity **Estimated Savings** Reduce initial server response time 0.58s V Eliminate render-blocking resources 0.45s V These suggestions can help your page load faster. They don't directly affect the Performance score. **DIAGNOSTICS** Ensure text remains visible during webfont load Largest Contentful Paint image was lazily loaded Does not use passive listeners to improve scrolling performance Image elements do not have explicit width and height Page prevented back/forward cache restoration — 4 failure reasons Serve static assets with an efficient cache policy — 18 resources found Avoid an excessive DOM size - 1,246 elements Avoid chaining critical requests - 9 chains found Largest Contentful Paint element - 850 ms Avoid large layout shifts - 1 element found Avoid long main-thread tasks — 1 long task found More information about the performance of your application. These numbers don't directly affect the Performance score. PASSED AUDITS (26) Show

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

about:blank 2/5

CONTRAST

Background and foreground colors do not have a sufficient contrast ratio. These are opportunities to improve the legibility of your content. **NAVIGATION** [id] attributes on active, focusable elements are not unique These are opportunities to improve keyboard navigation in your application. NAMES AND LABELS Elements with visible text labels do not have matching accessible names. Form elements do not have associated labels Links do not have a discernible name These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.
