Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

CONTRAST

CONTRAST	
▲ Background and foreground colors do not have a sufficient contrast ratio.	~
These are opportunities to improve the legibility of your content.	
NAMES AND LABELS	
▲ Form elements do not have associated labels	~
▲ Links do not have a discernible name	~

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

NAVIGATION

▲ Heading elements are not in a sequentially-descending order

✓

These are opportunities to improve keyboard navigation in your application.

AUDIO AND VIDEO

<video> elements contain a <track> element with [kind="captions"]

These are opportunities to provide alternative content for audio and video. This may improve the experience for users with hearing or vision impairments.
